## Try the DASH Eating Plan

## What is the DASH Eating Plan?

- The DASH (Dietary Approaches to Stop Hypertension) eating plan emphasizes fruits, vegetables, and low-fat dairy products. It also places more emphasis on whole grains and less emphasis on meats (see Table).
- Regular use of the DASH plan can lower your systolic BP by 8-14 points.

*Adapted from: Your Guide to Lowering Blood Pressure. NIH Publication No. 04-5232, p. 9. This plan is based on a 2000 calorie a day diet. If you are trying to lose weight, your number of daily servings or caloric needs may be lower.

## Tips for getting started and sticking with it:

- Set a goal that is easy to achieve. Make gradual changes. EXAMPLE: Eat one extra vegetable serving per day each week until you reach a goal of 4 servings a day.
- Try other ethnic foods for variety. Example: most people eat only two servings of beans a week. They're missing out on delicious lentil soups, black-beans-and-rice, hummus, and bean burritos.
- Look for low fat, low calorie foods that you enjoy for dessert or snacks (fresh fruit, dried fruit, sugar free gelatin). Try new fruits for variety.
- Get more tips about DASH diet in: Your Guide to Lowering Blood Pressure.
- Monitor your progress on a calendar. Treat yourself to nonfood rewards!
