

Pharmacy Practice 305 | Fall Semester (2 credits)

Consumer Self-Care & Over-the-Counter Drugs

Lecture

Tuesdays, 2:25-4:20 p.m.
Room 2002, Rennebohm Hall

Course Description

Provides learners with information regarding self-care of common, minor health conditions and appropriate use of over-the-counter (OTC) medications. Emphasis is placed on illness prevention, health condition symptoms, guidelines for OTC product use, adverse effects and alcohol/drug interactions of OTC products, precautions associated with OTC products (including pregnancy issues), and when to request professional care. The course is taught via lecture accentuated with active learning strategies in addition to assigned readings.
