**Pharmacy Practice Enhancement and Action Research Link (PearlRx)
Publication and Presentation Policy**

Purpose of the Publication and Presentation Policy:

To describe the expectations for researchers, PearlRx members, and PearlRx administrators regarding publishing and presenting research findings from PearlRx projects.

Publication and Presentation Expectations for Research Conducted in Collaboration with PearlRx:

- 1) The principal investigator of each project is responsible for ensuring that authorship and acknowledgments in the project's publication follows the "Uniform Requirements for Manuscripts Submitted to Biomedical Journals." It is expected that all individuals who work closely on these projects will be authors on publications as long as these requirements are met.
- 2) It is expected that all research conducted with PearlRx will ultimately be published in a scientific journal.
- 3) Professional presentations (i.e., posters and podiums) may be prepared by the project team, with the principal investigator responsible for taking the lead and ensuring adequate communication relate to roles and responsibilities for these presentations.
- 4) The principal investigator or designee will provide the following to a member of the PearlRx Coordinating Committee:
 - a. Semiannual update on project progress, to be shared with the PearlRx Advisory Board
 - b. Summary of research findings with final citation, to be shared with PearlRx Advisory Board, PearlRx members, and the membership of the Pharmacy Society of Wisconsin, as appropriate. Appropriately cited research findings may be shared with others to describe accomplishments of PearlRx.
- 5) All publications resulting from research conducted with PearlRx must include the name "PearlRx" within the abstract when possible. In the description of study sites and/or methods, papers/abstracts/posters/oral presentations must describe that the research was conducted with the Pharmacy Practice Enhancement and Action Research Link (PearlRx) of Wisconsin and acknowledge support from the UW Institute for Clinical Translational Research (see example text below). Authors may only list specific study sites with permission of the pharmacy owner/manager or other appropriate individual with authority to grant permission.
